

DIRECTOR, TECHNOLOGY ALIGNMENT

Seven States Power Corporation is looking for an experienced professional to join its growing team. To learn more about Seven States visit www.sevenstatespower.com

Job Summary:

Supports a team of subject matter experts who design, develop, and deploy technology products, services, and projects for local power companies (LPCs) in the Tennessee Valley. Executes the deployment of innovative technology such as electric vehicle charging infrastructure, renewables, and connectivity projects. Supports the development of various energy products and services that support electric utility systems and benefit communities in the Tennessee Valley. Works in cloud-based project management and data analytics software.

Functions are largely focused on building relationships, identifying innovative solutions, engineering design, and performing project management and installation work tasks for multiple ongoing technology projects in various stages of lifecycle. These functions include prioritizing and executing projects in a time-crunched, fast-paced and evolving environment; organizing work, schedules and coordinating with vendors/partners and ensuring follow-through; deploying projects for LPCs and maintaining continuous communication. Administrative tasks may include data entry, reporting, financial updates, compliance records tracking, funding proposal development, supporting requests for information (RFI), and request for proposals (RFP). Other duties as assigned.

Qualifications, Skills and Knowledge Requirements:

- BS, Engineering, Business, Project Management or 5-8 years of related equivalent experience.
- Must be able to travel approximately 25 percent of the time including overnight and day trips.
- Experience with project-management frameworks in an engineering/utility environment.
- Must have strong relationship building and project management skills.
- Strong demonstrated written and oral communication skills.
- Well organized, highly motivated, self-starter with minimal oversight required
- Proficiency in Microsoft Office (Outlook, Word, Excel, Power Point) and Adobe Acrobat required.
- Strong data analytics a plus +
- Experience with customer relationship management software a plus +
- Grants administration experience a strong plus +
- Motivated to learn and continuously develop professional knowledge
- Must have a passion for serving the electric utilities in the Tennessee Valley
- Position is full-time remote workplace and candidate must be located in the Tennessee Valley area.

General Information:

This job description is intended to describe the general nature and level of work being performed by the individual assigned to this position. It is not intended to be an exhaustive list of all duties, responsibilities and skills required for the position. Applicants must be able to work in a complex, confidential and changing environment. They must have a demonstrated ability to prioritize multiple, competing tasks and demands and to seek supervisory assistance as appropriate. Seven States Power Corporation is an equal opportunity employer.
